The Nixu Cybersecurity Index 2023 data was collected through personal interviews and an online survey in June–August 2023. The score is based on 174 responses.

What are the key findings this year?

1 Maintaining business resilience is the main driver for cybersecurity investments in 4/5 organizations.

2 AI causes unprecedented concern by enabling refined attacks, but it also bolsters defense.

3 Security monitoring, awareness, and access management are top priorities in the region.

4 A huge performance gap between the best and the rest: Top performers prioritize risk management.

5 Most organizations aim at a modest increase in their cybersecurity headcount.

What are organizations investing in in the next 12 months?
